## Data Analytics Resume Summary

I am an analytical and detail-oriented data analyst looking for my first role as a data analyst. I have created a portfolio that showcases my ability to extract actionable insights from complex datasets. Proficient in data cleaning, statistical analysis, and data visualization (with design thinking), contributing to data-driven decision-making processes. Strong expertise in SQL, Python, R, and spreadsheets, enabling efficient data manipulation and automation. Through much of my work history, I have demonstrated success in identifying trends and patterns to drive business growth, resulting in cost savings and revenue optimization. I am eager to apply my analytical skills to power data-centric strategies for a dynamic and innovative organization.
